To Whom It May Concern

It is stated that Mr. Muhammad Hassan, twenty-four years old male sustained spinal cord Injury. The patient's neurological improvement is slow. He got fracture in his back bone at T7 & T8 level, which cause loss of sensation to the level of umbilicus with loss of bowel and bladder control. His MRI Spine showed fracture to the T7 & T8 Level, resulting in spinal cord contusion / compression at the level of injury. These conditions cause difficulty for him to perform activities of daily living. He has sought different medical treatments for his disease but had little or no relief. His condition has decreased his quality of life.

Mr. Muhammad Hassan came to us after learning about Stem Cell treatment and upon consultation we recommended Umbilical Cord derived Mesenchymal Stem Cell treatment with minor surgical intervention, for his condition as there are good chances of improvement of his condition owing to incomplete spinal cord damage. Institute of Regenerative Medicine is a pioneer institute in Pakistan offering quality specialized Stem Cell treatment.

His stem cell treatment would be comprised of three sessions, each after a week for three consecutive weeks.

Total cost of Stem Cell treatment is Rs. 1,950,000/- (One Million and nine hundred fifty thousand PKR only). This includes Lab, Physician, Hospital, Surgery, OT, Stem Cell harvesting, Stem Cell treatment, Physiotherapy and other allied therapy charges.

Should you have any query regarding Mr. Muhammad Hassan's treatment please feel free to contact us.

Dr. Syed Salman Naeem Gilani.
Stem Cell Consultant.
